INTERNSHIP PROJECT REPORT

Analysis of YouTube Ad Conversion Performance

A Data-Driven Performance Study on Ad Creatives, Audience Targeting & Funnel Optimization

EXECUTIVE OVERVIEW

Project Context & Summary

Evaluating YouTube advertising funnels at Flair Mark Entertainment to uncover conversion bottlenecks, optimize ROAS, and lower Cost Per Acquisition (CPA) across key video formats.

Objectives & Scope

🎯 Primary Objectives

- Analyze conversion paths and view-through action behavior on YouTube video campaigns.
- Evaluate creative hooks, CTA placement, and audience drop-offs in the first 5 seconds.
- Identify high-performing audience segments to improve overall Return on Ad Spend (ROAS).

📊 Scope & Deliverables

- Audit of multi-campaign performance metrics across 5+ active video formats.
- Implementation of enhanced conversion tracking via Google Analytics 4 & GTM.
- Actionable framework for scaling high-converting UGC and in-feed video ads.

Analytical Methodology

1. Data Tracking

Configured Google Tag Manager and GA4 to accurately record TrueView engaged views, clicks, and cross-device conversions.

2. Funnel Audit

Mapped out VTR (View-Through Rate), CTR, and Conversion Rate (CVR) across top-of-funnel vs bottom-of-funnel campaigns.

3. A/B Testing

Executed creative split tests comparing UGC authentic hooks, professional voiceovers, and banner overlay CTAs.

Conversion Rate by Ad Format

Key Finding: Vertical YouTube Shorts ads yielded the highest Conversion Rate (4.4%) due to immersive smartphone framing and high mobile user intent.

Retention & Hook Impact

The First 5-Second Threshold

Data showed that 65% of total viewer drop-off occurs within the first 5 seconds of skippable ads.

- ✓ **Problem Hook:** Posing a direct problem in second 1-3 increased retention by 28%.
- ✓ **Authentic UGC:** Creator-led openings drove a 2.1x higher CTR compared to studio intro cards.
- ✓ **Early CTA:** Displaying on-screen text CTA before second 10 boosted direct conversions.

Core Performance Impact

-34%

Cost Per Acquisition

Campaign Optimization Outcome

By restructuring YouTube ad targeting and switching creative formats to short-form UGC vertical clips, the campaign achieved a major efficiency surge.

Result Highlight: Average CPA decreased by 34% while increasing overall conversion volume by 42% over an 8-week test window at Flair Mark Entertainment.

Audience Segment Comparison

Audience Segment	Impressions	CTR (%)	Avg. CPA (\$)	ROAS
Custom Intent (Search Keywords)	240,000	1.85%	\$14.20	3.4x
Website Remarketing	95,000	2.40%	\$9.80	4.8x
In-Market Buyers	510,000	1.10%	\$22.50	2.1x
Affinity Audiences	820,000	0.65%	\$34.00	1.2x

Monthly Conversion Growth Trend

Steady upward trajectory in monthly conversion volume following iterative optimization of ad scripts and landing page alignment.

Key Strategic Insights

 **3-Second Visual Hook Rule:** Authentic creator videos grab immediate attention, driving 2.4x higher initial retention than brand intros.

 **Custom Intent Scaling:** Targeting users based on their active Google Search queries yielded the lowest CPA outside of warm remarketing.

 **View-Through Attribution:** Over 40% of conversions happened post-view within 24 hours without an immediate ad click.

 **Call-To-Action Clarity:** Explicit voiceover commands combined with persistent sticky screen banners increased CTR by 31%.

Recommendations & Action Plan

Internship Certificate

OFFICIAL DOCUMENT

Completion Certificate

This certificate confirms the successful completion of the YouTube Ad Conversion Analysis internship at Flair Mark Entertainment.

Verified Role: Performance Marketing & Analytics Intern

Key Scope: YouTube Ad Funnel Audit, Creative A/B Testing & ROAS Optimization

Issued By: Flair Mark Entertainment

CONCLUSION

Thank You!
