

IILM UNIVERSITY, GREATER NOIDA
INTERNSHIP REPORT PRESENTATION

Flairmark Data Analyst Master

Virtual Internship

AICTE – EduSkills Virtual Internship Program | Supported by Flairmark

Lakshay Saxena

Roll No. 25scs1003000551 | B.Tech CSE | Batch 2025–2029
May – August 2026

ABOUT THE STUDENT

Lakshay Saxena

B.Tech - Computer Science & Engineering

IILM University, Greater Noida
Batch 2025 – 2029

ROLL NUMBER

25scs1003000551

INSTITUTE

IILM University, Greater Noida, U.P.

PROGRAMME

B.Tech CSE, Batch 2025-2029

INTERNSHIP DOMAIN

Flair Mark Data Analyst

DURATION & COHORT

13 Weeks | May – June 2026

PROJECT OBJECTIVES

What the Internship Set Out to Achieve

Data Wrangling with Python & Pandas

Perform vectorized array computing with NumPy and complex multi-table joins, conditional aggregations, and filtering using Pandas.

Relational SQL Ingestion

Extract and transform industrial transaction records using complex queries, GROUP BY filters, and analytical window functions.

Statistical EDA & Preprocessing

Isolate telemetry noise via IQR outlier detection, scale numerical features with Z-score, and reduce dimensions via PCA.

Supervised ML & Ensembles

Train and evaluate Logistic Regression, Random Forest classifiers, and SVMs to predict component failure cycles.

Unsupervised Anomaly Clustering

Discover distinct machine operating regimes using K-Means clustering, Elbow method optimization, and Silhouette scoring.

RapidMiner / Altair AI Studio

Build visual dataflow operators, execute zero-code AutoML benchmarks, and export deployable predictive models.

PROBLEM STATEMENT

Bridging Theory and Applied Industrial Data Science

Although undergraduate computer science students learn theoretical mathematical concepts of machine learning algorithms in coursework, very few get structured, hands-on exposure to processing noisy industrial sensor telemetry, addressing extreme class imbalance in machinery failure data, and deploying production pipelines using industry-standard tools like Python and RapidMiner.

Concepts such as PCA dimensionality reduction, IQR outlier mitigation, predictive maintenance classification, and AutoML workflows are often understood only theoretically with minimal practical execution. This internship addressed that gap by systematically implementing the complete end-to-end industrial data science lifecycle:

Ingest & Cleanse Telemetry

Feature Engineer & PCA

Train ML & Benchmark

RapidMiner AutoML & Deploy

CERTIFICATE ID:
FM-INT-2026-125

RECOGNIZING TALENT. INSPIRING FUTURES.

CERTIFICATE OF INTERNSHIP

THIS IS TO CERTIFY THAT

Lakshay Saxena

has successfully completed the Internship Program at **Flairmark Entertainments**
in the position of **Data Analyst Intern** during the period of
13 May 2026 to 12 August 2026 (3 Months).

During this internship, they have demonstrated dedication, hard work,
a positive attitude, and a strong willingness to learn.

We wish them all the best for their future endeavors.

INTERNSHIP DURATION
13 May 2026
to 12 August 2026
(3 Months)

DEPARTMENT
Data Analytics

LOCATION
Chandigarh

ROLE
Data Analyst Intern
